Learning numbers makes you strong  
Say it....nine and ten

## More about 'The Numbers Song'

Numbers Song is an informative catchy nursery rhyme that is designed to make children count in a fun way. Children are also taught to repeat, count in rhythm and in melodies so as to create memory and focus. Counting backward and forward can also be used as variations of the song to use it with early math. Teachers introduce numbers into the classroom in a fun way and parents sing it at home during their day to day activities. The combination of sound, movement and visual representation (e.g., fingers or

flashcards) allows children to learn the basic principles of numbers without a lot of trouble. Besides numbers, the rhyme is an additional way of attentiveness, pronunciation and awareness of the rhythm. One of the activities that are especially successful with preschoolers is Numbers Song because learning becomes a game and an anticipation of mathematics.
