

The Little Birds Song

Published by KidsWorldFun

The Little Birds Song

Little birds up in the sky,
Flapping wings as they fly high!
Singing songs so sweet and true,
Red, green, yellow, and some are blue!

Tweet, tweet, chirp along,
Birds are singing a happy song!
Hop and flutter, up they go,
Flying fast and flying slow!

Robins hop and peck
the ground,
Owls hoot without a
sound.

Parrots talk and
eagles soar,
So many birds to
learn and more!

Tweet, tweet, chirp
along,
Birds are singing a
happy song!

Hop and flutter, up

they go,

Flying fast and flying slow!

Nest in trees or on the sand,
Building homes with twigs in hand!
Baby birds will grow so strong,
Then they'll sing a brand-new song!

**Tweet, tweet, chirp along,
Birds are singing a happy song!
Morning, evening, all day through,
Birds are singing just for you!**

More about 'The Little Birds Song'

The song about Little Birds is very nice rhyme that deals with the loveliness of singing birds and flying birds. It makes children familiar with the beauties of nature and the need of taking attention about the living beings. Straight rhymes and a funny tune assist the children to familiarize themselves with birds, their noises, and the manner in which they fit the world. The song encourages one to listen to nature, observe and respect it. It is also interactive and involving to most parents and teachers because they apply it in the outdoor activities or nature lessons. Along with fun, it improves vocabulary, rhythm and emotional attachment to the natural world. The song Little Birds Song would be an ideal way to begin a conversation on the topic of wildlife with young learners.
